RETAIL AND BATCH GRINDER · 71 MM BURRS

GUATEMALA SHOP GRINDER

A bag and batch grinder for shops, roasteries and filter service. At 800–900 g a minute it grinds a retail bag in well under a minute, and its vertical burrs leave very little coffee behind between orders.

Made by Mahlkönig
Hamburg, Germany

71 mm	13–15 g/s	900 g	220 mm
special steel burrs	average grinding speed	bean hopper, approx.	wide on the counter

Figures published by Mahlkönig for the current Guatemala shop grinder (220–240 V).

WHAT IT DOES WELL

01
Fast bag grinding
At roughly 800–900 g a minute, a customer's 250 g retail bag is ground in seconds, so the queue keeps moving at the till.

02
Low retention
The burrs sit vertically, so ground coffee falls straight out rather than collecting inside. Less carry-over between different coffees and customers' orders.

03
Marked grind settings
Grind settings are printed on the unit, so staff can match a customer's brew method quickly without guesswork or trial runs.

04
Bag clamp and knocker
The spout has a metal knocker and a bag clamp, so bags stay put while grinding and the last grounds are cleared out.

05
Adjustable bag table
The table under the spout adjusts for height and lifts out, suiting small retail bags, larger wholesale bags and batch brewer baskets.

06
Long burr life
Mahlkönig quotes around 3,000 kg of coffee per burr set at a median setting, which keeps running costs predictable for busy retail counters.

WELL SUITED TO Cafés with retail shelves, roasteries, delis, farm shops and labs grinding bags or batch-brew quantities to order.

GUATEMALA SHOP GRINDER — SPECIFICATION

What you need to plan the space and power for this grinder. We confirm the details when we set it up.

GRINDER		
	Burrs	71 mm special steel, vertically mounted · approx. 3,000 kg life (median)
	Grinding speed	Approx. 800–900 g/min (13–15 g/s)
	Motor speed	2,900 rpm (50 Hz)
	Bean hopper	Approx. 900 g
	Dimensions (W × D × H)	220 × 330 × 620 mm
	Weight	28 kg net

ELECTRICAL		
	Power	1,100 W
	Supply	220–240 V, 50/60 Hz, single phase · standard UK 13 A socket
	Circuit protection	16 A slow-blow fuse, earthed socket (per Mahlkönig manual)

SIZE & FOOTPRINT

Size	220 × 330 × 620 mm
Weight	28 kg net

BEFORE IT ARRIVES

- [ ] Earthed 13 A socket within cable reach, on a 16 A circuit
- [ ] Stable, level counter space of at least 220 × 330 mm, rated for 28 kg
- [ ] At least 620 mm clear height, plus room above to fill the hopper
- [ ] Space in front of the spout for bags and the adjustable table

SUPPLIED, SET UP AND LOOKED AFTER BY MSS

Set-up & commissioning

We set up and commission the grinder on site, and show your team how to use and clean it properly.

Burrs, maintenance & repairs

Planned maintenance, burr replacement and responsive repairs from our own engineers, so grind quality stays where it should be.

Warranty & ongoing support

New equipment comes with a 12-month parts and labour warranty, subject to manufacturer terms. After that, we look after it for as long as you have it.
